

Public Law is the system of rules under which the organization and functioning of public administration is governed, e.g all public services of the state which execute public authority and their relationship to the citizens and administrative institutions. Issues relating to the administrative and judicial review, issued by the above-mentioned services, the formation of relationships with others and even the area under the responsibility of acting are governed by administrative law.

Division of Administrative Law is the Law of Foreigners, which regulates the entry and stay of foreigners in the country, family reunification, the status of third country nationals who are for a long period in Greece, and the free movement and residence within Greek territory of EU citizens and their family members.

"SKG Lawyers" provide specialized legal services in all of these areas in both advisory and litigation level.
